

COAST TO COAST GAS SELECTS WOODLANDS PHOENIX ETRM

The Woodlands, TX (May 1, 2009) – Woodlands Solutions today announced that Coast to Coast Partners, LLC (CCP) has selected Phoenix ETRM to manage its gas trading and marketing operations.

Headquartered in Dallas, TX, CCP, focuses on generating profits from niche markets in the Mid-continent, Southwest, and Western regions of the United States and providing unexcelled customer service to its customers and counterparties.

“I have worked with the principals at Woodland Solutions in the past and have also worked with their earlier systems products. I believe every marketing company needs a quality system that can provide easy, fast and accurate risk management information.” said Elsa Johnston, President of CCP. “After seeing Phoenix ETRM, I am confident it is the right solution for our business” she said.

Phoenix ETRM allows organizations to automate and standardize their business processing, demonstrably improve control over operations, ease coordination between business functions, and increase visibility into the organization’s operations.

“Our mission is to provide energy marketing organizations with a cost-effective, high-quality, feature-rich energy trading and risk management solution along with superior customer service.” said Michael Muse, President of Woodlands Solutions. “With Phoenix ETRM, we are confident we are achieving that mission.”

Woodlands Solutions expects to release the second version of their Phoenix ETRM solution in June of 2009.

About Woodlands Solutions

Woodlands Solutions is a provider of energy trading and risk management software solutions to energy marketing organizations. Woodlands Solutions' Phoenix ETRM product is a full-featured, front-to-back office energy trading and risk management solution used by energy companies to manage their trading and marketing operations. Phoenix ETRM was developed using the latest industry-standard Microsoft technology. Woodlands Solutions, headquartered in The Woodlands, Texas, USA, was founded in 2008.
