

WOODLANDS SOLUTIONS ANNOUNCES FORMATION

The Woodlands, TX (November 14, 2008) – Woodlands Solutions, LLC (Woodlands Solutions) announced today the company's formation, mission, and management team. Woodlands Solutions' mission is to provide energy trading and marketing organizations with a high-quality, feature-rich solution along with superior customer service at a price significantly below the industry average. To that end, Woodlands Solutions will develop Phoenix ETRM – a new energy trading and risk management solution directed at energy trading and marketing organizations.

Michael Muse will serve as President of Woodlands Solutions. Mr. Muse has over thirteen years of experience providing process and technology services to energy trading organizations. Mr. Muse received a Bachelor's Degree in Accounting in 1994 and a Masters Degree in Information Systems in 1996 from Louisiana State University. He began his career with Andersen's Financial and Commodity Risk Consulting practice, working with energy trading companies on technology related projects. Mr. Muse left Andersen in 2000 to be a founding principal of Woodlands Technology, a technology startup developing a next generation Energy Trading and Risk Management solution. In January 2004, the assets of Woodlands Technology were sold to a subsidiary of Siemens, after which Mr. Muse served in a product management capacity with direct responsibility for the ETRM solution line. Mr. Muse has a strong knowledge of energy trading business functions (including front, mid and back office) and their associated technology issues as well as significant real world experience designing, developing, selling, implementing, and managing ETRM solutions.

Stephen Wall will serve as Chief Technology Officer of Woodlands Solutions. Mr. Wall has over eighteen years of experience designing and developing complex software applications including over eleven years of experience with Energy Trading and Risk Management (ETRM) systems. Mr. Wall received a Bachelor's degree in Computer and Information Sciences from the Ohio State University in 1990. Mr. Wall began his career with Battelle Memorial Institute's Statistics and Data Analysis group providing clients with complex analytical processing solutions. Mr. Wall left Battelle in 1997 to accept a position with Louisville Gas and Electric (LG&E) in which he spearheaded the development of an ETRM system for use in the management of LG&E's gas and power trading operations. Mr. Wall left LG&E in 2001 to join Woodlands Technology, a technology startup developing a next generation ETRM solution. In January 2004, the assets of Woodlands Technology were sold to a subsidiary of Siemens, after which Mr. Wall served as the development manager and chief architect for the ETRM solution line. Mr. Wall has proven experience architecting and managing large development projects and significant real world experience designing, architecting, and developing ETRM solutions.

Woodlands Solutions expects to release the first version of their Phoenix ETRM solution in March of 2009.

About Woodlands Solutions

Woodlands Solutions is a provider of energy trading and risk management software solutions to trading and marketing organizations. Woodlands Solutions' Phoenix ETRM product is a full-featured, front-to-back office energy trading and risk management solution used by energy companies to manage their trading and marketing operations. Phoenix ETRM was developed using the latest industry-standard Microsoft technology. Woodlands Solutions, headquartered in The Woodlands, Texas, USA, was founded in 2008.
